

Coding with Style: Takeaways

by Dataquest Labs, Inc. - All rights reserved © 2021

Syntax

- Adhering to style guidelines

```
SELECT columns
  FROM table_name
 LIMIT 10;
```

- Single line comments:

```
-- First comment
SELECT first_name, last_name, email -- Second comment
  FROM employee; -- Third comment
```

- Block comments:

```
/*
This comment
spans over
multiple lines
*/
SELECT first_name, last_name, email
  FROM employee;
```

Concepts

- Comments are readable messages in code that SQL ignores.
- Reserved words have a special function and shouldn't be used for anything else.
- Consistency when writing code makes it easier for others to understand.
