Coding with Style: Takeaways 凼

by Dataquest Labs, Inc. - All rights reserved © 2021

Syntax

· Adhering to style guidelines

```
SELECT columns

FROM table_name
LIMIT 10;
```

• Single line comments:

```
-- First comment

SELECT first_name, last_name, email -- Second comment

FROM employee; -- Third comment
```

Block comments:

```
/*
This comment
spans over
multiple lines
*/
SELECT first_name, last_name, email
FROM employee;
```

Concepts

- Comments are readable messages in code that SQL ignores.
- Reserved words have a special function and shouldn't be used for anything else.
- Consistency when writing code makes it easier for others to understand.

Resources

- Database management system
- SQL reserved words
- Reserved word
- Brain reading computer code
